More people are having more meetings

From installation to use, the Panasonic RoomBook is designed to fit seamlessly and work without hassle.

LCD vs E-Paper

Energy efficient, Go Green with E-Paper Displays that consume power only when the displayed content updates, unlike LCDs which continuously need power. Thus, E-Paper Displays are ~99% more energy efficient than LCDs making **Panasonic RoomBook** the most sustainable solution on the market.

Simple installation

The devices are completely cordless & can be attached to any surface, even glass. Without tools, bolts or brackets.

Smooth onboarding

Built with an intuitive user interface and a smooth and tested user experience, **Panasonic RoomBook** is easy to deploy, manage, and use.

Portal

Managing all at one place. Add meeting rooms, assign to devices, check battery life and connectivity status.

Room analytics

Save on company resources. Multiple reports & dashboards on your company's bookable space usage helps you separate the most popular rooms from the ones left unattended.
